PFP was launched on July 22, 2006 by residents and workers in the Queens power-outage communities of Sunnyside, Woodside, Astoria and Long Island City. PFP volunteers have petitioned, held forums, mobilized for and spoken at public hearings, and participated as a community voice in the state investigation of the nine-day July 2006 Queens Power Outage. PFP is fighting for justice, an economic-and-public-health-impact study, and full reimbursement for all outage damages and losses. labor donated
